DATA!!

simple data
composite data
- objects }

functions
- testing
- parameter

logic
if

lists
- comprehensions

loops

patterns
- map
- filter

while

list functions

fold {
- search
- min/max
- sum
- ascending (ordered)
value
index

- strings

→ sequence

→ encodings

→ split, trim,
upper, isupper

- files

- lists of list

data

- primitive
- objects
- sequences

decisions

iterate/repeat

functions

Groing Forward

- start early
- ask questions
- read carefully
- practice debugging
